Cited-by Linking

What do publishers need to do?

- Link references using the DOI

1-1 References

- 1 Involvement of mitochondrial dynamics in the segregation of mitochondrial matrix proteins during stationary phase mitophagy**
H Abeliovich, M Zarei, KTG Rigbolt, RJ Youle, J Dengjel
Nature Communications, 4, 2013
<http://dx.doi.org/10.1038/ncomms3769>
- 2 A suite of Gateway cloning vectors for high-throughput genetic analysis in *Saccharomyces cerevisiae***
S Alberti, AD Gitler, S Lindquist
Yeast, 24, 913-919, 2007
<http://dx.doi.org/10.1002/yea.1502>
- 3 Proteolytic control of mitochondrial function and morphogenesis**
R Anand, T Langer, MJ Baker
Biochimica Et Biophysica Acta (BBA) - Molecular Cell Research, 1833, 195-204, 2013
<http://dx.doi.org/10.1016/j.bbamcr.2012.06.025>
- 4 Designer deletion strains derived from *Saccharomyces cerevisiae* S288C: a useful set of strains and plasmids for PCR-mediated gene disruption and other applications**
C Baker Brachmann, A Davies, GJ Cost, E Caputo, J Li, P Hieter, JD Boeke
Yeast, 14, 115-132, 1998
[http://dx.doi.org/10.1002/\(SICI\)1097-0061\(19980130\)14:2<115::AID-YEA204>3.0.CO;2-2](http://dx.doi.org/10.1002/(SICI)1097-0061(19980130)14:2<115::AID-YEA204>3.0.CO;2-2)

So you've done the basics, what next?

So you've done the basics, what next?

- Don't just link references, deposit them!

So you've done the basics, what next?

- Don't just link references, deposit them!
- Participate in cited-by linking

So you've done the basics, what next?

- Don't just link references, deposit them!
- Participate in cited-by linking
 - Let authors and readers see who's citing the content and building on the research

So you've done the basics, what next?

- Don't just link references, deposit them!
- Participate in cited-by linking
 - Let authors and readers see who's citing the content and building on the research
 - Discoverability: linking readers to other related content

So you've done the basics, what next?

- Don't just link references, deposit them!
- Participate in cited-by linking
 - Let authors and readers see who's citing the content and building on the research
 - Discoverability: linking readers to other related content
- Add richer metadata, funding, Orcid, retractions, etc.

So you've done the basics, what next?

- Don't just link references, deposit them!
- Participate in cited-by linking
 - Let authors and readers see who's citing the content and building on the research
 - Discoverability: linking readers to other related content
- Add richer metadata, funding, Orcid, retractions, etc.
- Add CrossMark to display these metadata

How to deposit references

- As part of a metadata deposit
- As a separate resource-only deposit
- Schema available for deposit of reference lists for articles that already have DOI
- Simple Text Query Deposit
 - Using the simple text query form

Cited-by Linking

- Publishers, editors, authors:
 - Who is citing your content?

- Readers:
 - What articles have cited the content that you are reading?

Cited-by Linking

- Free member services
- Dynamically generated list of forward links
 - Who is citing your content?
- More than 400 participants

Biofouling: The Journal of Bioadhesion and Biofilm Research

API, Metadata, References

Edit

Known unknowns

If you follow this blog, you are going to notice a theme over the coming months- Crossref supports the deposit and distribution of [a lot more kinds of metadata](#) than people usually realise.

We are in the process of completely revamping our web site, help documentation, and marketing to better promote our metadata distribution capabilities, but in the mean time we think it would be useful highlight one of our most under-promoted functions- the ability to distribute references via Crossref.

<http://blog.crossref.org/2016/06/distributing-references-via-crossref.html>

Crossref

Event Data

(coming soon!)

In a nutshell...

In a nutshell...

- open clearinghouse of data on publications activity online
- tracking events such as shares, mentions, discussions, recommendations, usage, etc.
- for publishers, funders, institutions, media outlets, technology providers, etc. to enable research monitoring, discovery, and information management

Initial DET Sources

BLOGS & REFERENCE WORKS	SOCIAL BOOKMARKS	SOCIAL SHARES & DISCUSSIONS	LINKS TO RESEARCH ENTITIES
Research Blogging	CiteULike	Facebook	ORCiD
ScienceSeeker	Mendeley	Reddit	DataCite
Wordpress.com		Twitter	Europe PMC Database Citations
Wikipedia			

Clearinghouse as infrastructure

A central point for collecting and propagating data to the community, benefits of scale and ease of access:

- no need to manage multiple online sources where scholarly activity occurs
- no need for individual bilateral agreements between consumer and sources
- comprehensive tracking coverage across publishers

Infrastructure transparency & trust

Data is:

- comprehensive - collected for all Crossref DOIs, regardless of publisher
- open - made openly available to all
- comparable - collected in a standard way across aggregators
- auditable & portable
- long term data preservation

Data, not metrics

Ready to use:
programmatically
available for tool
development & reuse

Use cases

- Surface qualitative stories about researcher work
- Report on the reach of research within specific communities & public at large
- Identify hot, new areas for journal development
- Inform editor and reviewer recruitment efforts
- Discover relevant research
- Discover new collaborators
- Track funding results
- Report on institutions and consortia outputs...

Have you taken a peek inside yet?

Keep an eye on our development

We will continue to add new data sources to the early preview interface as they are developed. Be warned though, we may break a few eggs from time to time!

So keep an eye on our information page at <http://eventdata.crossref.org/> as well as the Crossref Blog for regular progress updates.

But if you're game, why not jump straight on to <http://api.eventdata.crossref.org/> and start your data discovery journey.

Distributed Usage Logging

Distributed Usage Logging

- Peer-to-peer channel to securely exchange & process private usage records from hosting platforms
- For publishers to capture usage in a distributed sharing environment with data that can be normalised (COUNTER-compliant)
- Blog post at: <http://blog.crossref.org/2015/12/private-channel-dul.html>

New Usage Platforms

Research Collaboration Networks (RCN)

Crossref infrastructure

Original
Publishers
(A, B, C, D, etc.)

Current Status

- Entails close collaboration between COUNTER, Crossref, publishers and third-party platforms. Working on:
- Technical infrastructure development
- Definition of the usage logging message i.e. does it have the information COUNTER needs?
- Assignment and validation of credentials to participate in the scheme
- Participant integration of the API
- Incorporation of the data type into the COUNTER code of practice
